GRIGG™ ELICITOR®

1-2-4

GRIGG™ Elicitor® is a GRIGG™ Proven Foliar® nutrition product that contains elicitors, which can help induce plant defense response. These elicitors may be derived from biological and chemical compounds. Research has shown elicitors can help maintain a healthy plant in heat, cold, saline, or other types of environmental stresses or disease.

Elicitor Advantages

- Elicitor contains various molecules both biotic and abiotic such as silicon, molybdenum, cobalt, zinc, kelp, yucca, NBE (natural biological extracts) and others which are known elicitors.
- Organic acids and amino acids are present to help in the absorption and translocation of nutrients.
- Potassium is present to maintain stomatal control and assist in foliar uptake.
- Chelated micronutrients enhance foliar and root uptake.
- Elicitors trigger mechanisms within the plant to resist stresses such as disease, heat, cold, salinity, etc.
- Elicitors signal plants to form phytoalexins (low molecular weight compounds that offer plant resistance).
- Elicitor may be applied as a foliar or through root absorption.

Application and Use

Turfgrass:

Apply 1-4 fl oz. per 1000 ft² (6-15 L/Ha). Repeat as needed.

Guaranteed Analysis

Total Nitrogen (N)	1.0%
0.3% Ammoniacal Nitrogen	
0.7% Urea Nitrogen	
Available Phosphoric Acid (P ₂ O ₅)	2.0%
Soluable Potash (K ₂ O).....	4.0%
Cobalt (Co)	0.002%
Copper (Cu).....	0.05%
Iron (Fe)	0.10%
Manganese (Mn)	0.05%
Molybdenum (Mo)	0.004%
Zinc (Zn)	0.05%
Nickel (Ni)	0.01%
Silicon (Si)	0.01%

Derived from urea, ammonium phosphate, potassium, phoshate, colbalt sulfate, iron sulfate, manganese sulfate, molybdenum sulfate, zinc sulfate, nickel sulfate and silicate. Chelated with glucoheptonates.
