GRIGG™ GREENPIG™ ULTRA

GRIGG™ GreenPIG™ Ultra is a premium pigment additive specifically formulated for golf courses and turf facilities to enhance and extend aesthetic turf appearances. GreenPIG Ultra is an excellent tool to enhance turf color during the growing season and to mask dormant turfgrass in the winter months. GreenPIG Ultra is engineered with UV stable pigments and provides a natural, deep green color.

GreenPIG Ultra Advantages

- Highly concentrated for low use rates.
- Long lasting means less frequent applications.
- Cost competitive, fits most budgets.
- Natural deep green color improves visual quality and turf presentation on all grass species, including semi-dormant or dormant turfgrass.
- Less abrasive on spray pumps than most turf paints.
- Improved turf health by reducing oxidative stress during exposure to high heat.
- Alternative to overseeding an excellent way to reduce costs and provide superior winter putting surface.

Application and Use

Do not apply near waterways. Do not apply to wet turf, it may delay drying of GreenPIG Ultra. This product may stain, keep off unwanted areas. If accidentally spilled, GRIGG pigments can be removed from skin or equipment with several washings of soap and water. Avoid letting GRIGG pigments concentrate come into contact with fabrics.
