GRIGG™ GREENPIG™ UV

GRIGG GreenPIG-UV is a premium pigment additive. It provides natural green turf color for up to one month. It also contains a compound that reduces turf exposure to potentially harmful ultraviolet (UV) light, which may improve turfgrass quality. It may also promote more efficient energy capture and reduce oxidative stress.

Key Advantages

- Contains a proprietary compound that blocks UV, which may enhance turf quality
- Fast dry time
- Pigment is less abrasive on spray pumps than paint
- Applying pigment provides additional color and is an excellent alternative to overseeding

Application and Use

Maintenance Rate: Apply with 50-100 gallons of water [190-380 L of water].

Golf Course Putting Greens: 2-4 fl oz per 1,000 sq ft [7-13 L per hectare].

Optimum rate of application will vary depending on treatment interval, turfgrass species, mowing height, weather conditions and time of year. Generally, higher mowing heights and warm season turfgrasses will require higher rates to achieve the best results. **Do NOT apply to dormant or semi-dormant turfgrass.** For dormant turf, use GRIGG GreenPIG Ultra. **Do NOT use on drought stressed turf grass.**
