

GRIGG® IRON COMBO™ 1-0-2

RATE RECOMMENDATIONS FOR PROFESSIONAL USE ONLY

To prevent or correct nutrient deficiencies, apply GRIGG IRON COMBO 1-0-2 as a foliar spray early in the morning or late afternoon. Allow 3-6 hours for drying time before irrigation. Best to apply after mowing.

Cool or Warm Season Grasses: Apply 2-6 fl oz per 1000 sq ft or 0.75-2 gal per acre [7-20 L per hectare] as needed every 7-14 days.

Make frequent applications at lower rates, or apply higher rates at times of greater plant demand. Optimum rate of application will vary depending on treatment interval, soil properties (such as pH, organic matter content, texture), weather conditions, time of year, plant species and its nutrient requirements. For best results, follow soil/tissue test recommendation.

MIXING AND HANDLING INSTRUCTIONS

Agitate before use. Apply in 1-2 gal of water per 1000 sq ft (44-88 gal of water per acre) [400-800 L of water per hectare]. Fill mix tank with half of required water volume and begin agitation. Add products in this order, mixing thoroughly after each addition: adjuvants, pesticides, then fertilizers. Fill tank with remainder of water and continue agitation until solution is completely mixed. Check chemical mixture compatibility using a jar test prior to application.

NOTE: This product may stain. Keep off unwanted areas such as sidewalks, patios, driveways, fences, painted areas. As a precaution, wash off unwanted areas with water immediately after application.

Net Contents: 2.5 gallons (9.46 liters)

Density: 12.3 lb/gal @ 68°F
Net Weight: 30.5 lb (13.8 kg)
