

GRIGG[™]

Z-MENDIT[™]

RATE RECOMMENDATIONS FOR PROFESSIONAL USE ONLY

GRIGG Z-MENDIT is a natural soil amendment that improves the chemical and physical properties of the soil by increasing cation exchange capacity (CEC). May be used on all soil types, but best to use on sandy or loam (modified sand) soils. Blend into a root-zone mix prior to planting to enhance establishment. Can also be injected into the root-zone.

Flower Beds: Apply approximately 10% by volume to the soil in the areas where plants will be located. Mix into the existing soil with a rake or rototiller. For a 3 in (7.5 cm) deep root zone, use 150 lb per 100 sq ft (610 kg/ 100 sq m).

Trees and Shrubs: Mix 10-20% by volume in the backfill for the shrub or tree. Blend with backfill soil, peat or other materials used for filling the root ball hole.

Turfgrass Maintenance/Top Dressing: When applying to established turf, best results will be obtained if product is worked into the root zone after mechanical treatment (aeration, drill and fill, injection, etc) to ensure adequate uniformity and depth of product into the soil profile. Apply 275-500 lb per 1000 sq ft (120-245 kg/100 sq m) following mechanical treatment.

Turfgrass Planting/Construction: Apply at least 5% by volume to 4 in (15 cm) minimum depth. Recommended rate is 10-15% by volume. Blend with sand prior to placement or lay out a grid of known size and apply the appropriate amount to each grid. Blend with rake or rototiller then proceed with seeding, sprigging or sodding.

Divot Mix: Combine with an equal amount divot mix (sand).

Optimum rate of application will vary depending on treatment interval, soil properties (such as pH, organic matter content, texture), weather conditions, time of year, plant species and its nutrient requirements.

INGREDIENT:
100% Zeolite

F76

Information regarding the contents and levels of metals in this product is available on the Internet at <http://www.aapfco.org/metals.html>

Information about the components of this lot of fertilizer may be obtained by writing to Brandt Consolidated, Inc. and giving the lot number which is found on the bag.

Precautionary Statements: Based on currently available data, this product is not classified as a GHS hazardous substance. However, observe good industrial hygiene practices. Wash hands after handling.
Storage and Disposal: Do not contaminate water, food or feed by storage or disposal. Keep out of reach of children. Store away from incompatible materials. Dispose of contents/container in accordance with local authority requirements.
