

## GRIGG<sup>®</sup> MICRO BURST<sup>™</sup> 0-0-1

GRIGG Micro Burst is a multi-nutrient formulation that contains potassium, boron and amino acid complexed micronutrients. It is an excellent option for improving turf color and correcting micronutrient deficiencies.

## **Key Advantages**

- Contains soluble nutrients for efficient uptake and use
- Iron plays a key role in chlorophyll production, which improves turf color
- Manganese plays a key role in plant enzyme functions and photosynthesis
- Recommended for golf and sports turf

## **Application and Use**

**Cool or Warm Season Grasses:** Apply 2-4 fl oz per 1,000 sq ft or 0.75-1.25 gal per acre [7-13 L per hectare] as needed every 7-14 days.

Make frequent applications at lower rates, or apply higher rates at times of greater plant demand. Optimum rate of application will vary depending on treatment interval, soil properties (such as pH, organic matter content, texture), weather conditions, time of year, plant species and its nutrient requirements. For best results, follow soil/tissue test recommendation.

GRIGG is part of Brandt Consolidated, Inc. 2935 South Koke Mill Road Springfield, IL 62711 www.brandt.co

## **Guaranteed Analysis**

Soluble Potash (K <sub>2</sub> O)
Boron (B)
Copper (Cu)
0.05% Water soluble copper
Iron (Fe)
3.40% Water soluble iron
Manganese (Mn)
2.40% Water soluble manganese
Molybdenum (Mo)
Zinc (Zn)1.00%
1.00% Water soluble zinc

Derived from potassium citrate, sodium borate, copper amino acid complex, iron amino acid complex, manganese amino acid complex, sodium molybdate and zinc amino acid complex.
