

# GRIGG®

# GREENPIG™ UV

## RATE RECOMMENDATIONS FOR PROFESSIONAL USE ONLY

For best results, apply GRIGG GREENPIG UV in the early morning or late afternoon. Allow a minimum of 1 hour dry time before re-entry or irrigation. Best to apply after mowing.

**Maintenance Rate:** Apply with 50-100 gallons of water [190-380 L of water].

**Golf Course Putting Greens:** 2-4 fl oz per 1,000 sq ft [7-13 L per hectare].

Optimum rate of application will vary depending on treatment interval, turfgrass species, mowing height, weather conditions and time of year. Generally, higher mowing heights and warm season turfgrasses will require higher rates to achieve the best results. Do NOT apply to dormant or semi-dormant turfgrass. For dormant turf, use GRIGG GREENPIG ULTRA. Do NOT use on drought stressed turf grass.

## MIXING AND HANDLING INSTRUCTIONS

Maintain constant agitation during batching and spray application. Spot test for acceptable color depth prior to full scale spraying. Adjust rates as needed. Avoid overspray where colorant is not desired or staining may occur. Retain mix rate records as a reference for future spray applications. To insure optimal spray equipment performance, thoroughly clean spray equipment after use with a quality tank cleaner.

**Net Contents: 2.5 gallons (9.46 liters)**

## Pigment Additive

GRIGG GREENPIG UV is engineered with premium pigments to enhance and extend aesthetic turf appearances while delivering performance in all seasons. This product is safe for all varieties of turfgrass and provides color performance for up to one month. GRIGG GREENPIG UV contains a proprietary compound designed to provide ultraviolet light (UV) blocking protection for enhanced turf quality and performance. This product offers turf managers yet another options for enhancing turfgrass color and quality by reducing exposure to potentially harmful ultraviolet and near infrared light while maintaining option capture of photosynthetically active visible light. This promotes more efficient energy capture and a reduction in oxidative stress. This product is compatible with fertilizers, plant growth regulators and crop protectants, and is pump seal friendly.

Research Driven,  
Proven Results™

**Precautionary Statements:** Based on currently available data, this product is not classified as a GHS hazardous substance. However, observe good industrial hygiene practices. Wash hands after handling. **Storage and Disposal:** Do not contaminate water, food or feed by storage or disposal. Keep out of reach of children. Store away from incompatible materials. Dispose of contents/container in accordance with local authority requirements.
