

# GRIGG®

# MAGNESIUM COMPLEX™

## RATE RECOMMENDATIONS FOR PROFESSIONAL USE ONLY

To prevent or correct nutrient deficiencies, apply GRIGG MAGNESIUM COMPLEX as a foliar spray early in the morning or late afternoon. Allow 3-6 hours for drying time before irrigation. Best to apply after mowing.

**Cool Season Grasses:** Apply 1-3 fl oz per 1,000 sq ft or 0.25-1 gal per acre (4-10 L per hectare) as needed every 7-14 days.

**Warm Season Grasses:** Apply 2-4 fl oz per 1,000 sq ft or 0.75-1.25 gal per acre (7-13 L per hectare) as needed every 7-14 days.

Make frequent applications at lower rates, or apply higher rates at times of greater plant demand. Optimum rate of application will vary depending on treatment interval, soil properties (such as pH, organic matter content, texture), weather conditions, time of year, plant species and its nutrient requirements. For best results, follow soil/tissue test recommendation.

## MIXING AND HANDLING INSTRUCTIONS

Agitate before use. Apply in 1-2 gal of water per 1,000 sq ft (44-88 gal of water per acre) [400-800 L of water per hectare]. Fill mix tank with half of required water volume and begin agitation. Add products in this order, mixing thoroughly after each addition: adjuvants, pesticides, then fertilizers. Fill tank with remainder of water and continue agitation until solution is completely mixed. Check chemical mixture compatibility using a jar test prior to application.

## GUARANTEED ANALYSIS

Magnesium (Mg) .....	5.0%
5.0% Water soluble magnesium	
Derived from magnesium amino acid complex.	F76

GRIGG Proven Foliar® is the turf grass industry's premier foliar nutrient line backed by years of innovation, research and proven results.

Do not apply near water, storm drains, or drainage ditches. Do not apply if heavy rain is expected. Apply this product only to your lawn/garden. Check with your local Cooperative Extension Agency to obtain specific information on local turf best management practices.
