NUTRITION PROGRAM

ANTI-STRESS/ANTI-DROUGHT TEK PAK

As temperatures heat up and natural rainfall diminishes, help turf fight back with the Anti-Stress, Anti-Drought Tek Pak - featuring two combined anti-stress and anti-drought chemistries from GRIGG®.

GRIGG MegAleX is a university tested foliar applied formulation that helps create deep, robust root systems that tap water and nutrients beneath the surface, and contains a patented glycoregulator technology that boosts plant energy, photosynthesis and respiration. GRIGG Turftopia is a Proven Foliar formulation that contains essential nutrients and a suite of osmoprotectants that help maintain cellular hydration and reduce plant stress.

When combined, these two products help keep turf healthy and hydrated during intense environmental conditions. This Tek Pak is recommended for greens applications as a supplement to existing fertilizer programs.

The Anti-Stress, Anti-Drought Tek Pak contains:

6 cases GRIGG MegAleX

6 cases GRIGG Turftopia

For Anti-Stress, Anti-Drought Applications May-September

Product	fl oz/1,000 sq ft
Week 1	
GRIGG MegAleX®	3
Week 2
